Profile Summary

Aspiring MERN Stack Developer with hands-on experience building full-stack web applications including real-time chat platforms, authentication systems, and academic resource portals. Proficient in React.js, Node.js, Express.js, MongoDB, and Redux Toolkit, with a strong foundation in REST API design, JWT-based authentication, and responsive UI development

Education

LDRP Institute of Technology and Research, Gandhinagar

BE in Computer Engineering

Aug 2022 – Apr 2026

CGPA : 7.89 / 10

Technical Skills

Languages: JavaScript, HTML5, CSS3

Frameworks & Libraries: React.js, Redux Toolkit, Node.js, Express.js, Tailwind CSS, Socket.io

Databases: MongoDB, MongoDB Atlas, MySQL

Tools & Platforms: Git, GitHub, Postman, Render, REST APIs, JWT Authentication

Work Experience

Elsner Technologies Pvt. Ltd.

May 2025 – June 2025

React.js Developer Intern

- Built 5+ reusable UI components using React.js, reducing development time for new features by improving code reusability across the project.
- Implemented frontend functionalities using JavaScript, HTML5, CSS3, and React.js following component-based architecture best practices.
- Integrated REST APIs using React Hooks and Context API to enable dynamic data rendering and state management.
- Utilized Git and GitHub for version control and collaborative development workflows.

Projects

UniNotes | Live Demo | Github

React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a centralized academic resource platform serving 3 user roles (guest, student, admin), solving the real-world challenge of finding study materials scattered across multiple faculty-shared sources and communication channels.
- Established JWT-based authentication and role-based access control (RBAC), ensuring secure access across guest, student, and admin roles.
- Built core features including PDF upload/download, bookmarking, search, and centralized content management through an admin dashboard.
- Designed responsive UI in React.js and RESTful APIs with MongoDB, ensuring smooth performance across devices.

PulseChat | Live Demo | Github

React.js, Node.js, Express.js, MongoDB, Socket.io, Redux Toolkit, Tailwind CSS

- Built a real-time one-to-one chat application using Socket.io, supporting instant messaging, typing indicators, and live online status tracking.
- Configured JWT authentication and image-sharing functionality, enhancing user engagement and security.
- Developed responsive UI with React.js, Redux Toolkit, and Tailwind CSS for seamless cross-device communication.
- Deployed on Render with MongoDB Atlas, ensuring reliable cloud-hosted database management and backend availability.

Achievements

- NPTEL Python for Data Science — Silver Elite Certification
